Senior Backend Engineer (Node.js/NestJS) with 5+ years of commercial experience. High-load systems, event-driven architecture, PostgreSQL optimization, and team leadership in gaming and fintech.

Relevant Experience

[Limesco LTD](#); Nicosia, CY- Senior Backend Engineer May 2022 – Present

- Designed and scaled backend architecture for a high-load gaming platform (NestJS, GraphQL, Redis, RabbitMQ)
- Built distributed messaging system processing ~2M messages/dayDesigned and implemented a messaging system between high-load services (~2 million messages per day).
- Optimized search over 30M+ records (10s to 2s, ~80% improvement)Lead a team of 2 junior developers: task breakdown, code review, mentoring, and sprint planning.
- Implemented OAuth2/JWT authentication and improved system security (XSS, CSRF protection). Deployed and operated backend services on Kubernetes; containerized workflows with Docker in production.
- Use AI-assisted development (Cursor) for refactoring, test scaffolding, and legacy code exploration while maintaining code ownership and review standards.

[Crypton Studio](#); Tomsk, RU - Senior Backend Engineer February 2021 – May 2022

- Developed REST APIs for crypto platform (staking, wallet features)
- Designed DB schemas and implemented business logic (NestJS)
- Integrated blockchain (Decimal) and async pipelines (RabbitMQ, Redis)
- Improved dashboard performance by 90% (30s to 3s)
- Optimized batch processing (10k rows) by 80% using parallel execution

[Evaxsoft](#); Tomsk, RU - Web Developer

April 2020 – January 2021

- Developed web services using Laravel & JavaScript
- Integrated PayPal and Stripe billing systems
- Improved file upload performance and system reliabilit

Technical Skills

Languages: TypeScript, JavaScript, SQL, PHP

Frameworks: NestJS (4 years), Express.js (1 year), Laravel (1 year)

Databases: PostgreSQL, MongoDB, Redis

Infrastructure: Docker, Kubernetes, AWS, Linux, Git, CI/CD, RabbitMQ

Practices: Jest, Sentry, OAuth/JWT, GraphQL, REST API, OpenAPI, code review, AI-assisted development (Cursor)

Education

Tomsk Polytechnic University

February 2015

- Engineer's degree in Nuclear Power Generation Industry (career transition to software engineering since 2020)

Languages

- Russian (native)
- English (upper-Intermediate)
